quarantine alert

The information here covers AQIS quarantine requirements only and is current on the date of transmission but may change without notice. AQIS makes no warranties or representations with respect to the accuracy or completeness of that information and will bear no liability with respect to that information. Importers must satisfy quarantine concerns and comply with quarantine conditions applicable at the time of entry. The Commonwealth through AQIS is not liable for any costs arising from or associated with decisions of importers to import based on conditions presented here which are not current at the time of importation. It is the importer's responsibility to verify the accuracy and completeness of the information at the time of importation.

It is the importer's responsibility to identify and to ensure it has complied with, all requirements of any other regulatory and advisory bodies prior to and after importation including the Australian Customs Service, Therapeutic Goods Administration, Department of Health and Ageing, Department of the Environment, Water, Heritage and the Arts, Australian Pesticides & Veterinary Medicines Authority and any State agencies such as Departments of Agriculture and Health and Environmental Protection authorities.

Importers should note that this list is not exhaustive. Importers should also note that all foods imported into Australia must comply with the provisions of the Imported Food Control Act 1992, an Act which is administered by AQIS.

Notification of the import must be provided to AQIS for all imported goods other than goods imported as accompanied baggage or goods imported via the mail and not prescribed under the Customs Act 1901. Notification must be consistent with Quarantine Regulations 2000 (examples include a Quarantine Entry or a Quarantine declaration).

Public Quarantine Alert PQA0761

Notice to plant importing industry

Implementation of mandatory Phytosanitary certification for all live plants imported into Australia.

On 14 September 2011 a Public Quarantine Alert (PQA0753) was issued noting AQIS's intention to implement revised import conditions requiring all consignments of live plants, including tissue cultures, to be accompanied by an official Government Phytosanitary Certificate.

This Alert is to advise that ICON has now been amended to reflect these new requirements.

Further to this, the additional declarations required on Phytosanitary certificates for tissue cultures **with media** have been amended from what was previously advised in PQA0753.

✓ **For Tissue Cultures with media the additional declaration required is as follows:**

"Tissue cultures in this consignment were visually inspected immediately prior to export and found to be free from any symptoms of disease or microbial infection."

✓ **For Tissue Cultures free of media the existing additional declaration will remain as follows:**

"Prior to the removal of the plant tissue from media, the tissue cultures were inspected and found to be free of contamination. The plant tissue was aseptically transferred under supervision to sterile containers which were then sealed and not subsequently re-opened".

From 17 October 2011 import permits will contain these new requirements.

Please contact the Plant Quarantine Program at: plantquar@aqis.gov.au or by telephone on (02) 6272 3917 if you have any queries about an import permit or application.
