Regulations for Slaughter Operations

Amended on November 24 2020.

Article 2

Slaughterhouses must conduct one of the following measures to ensure that the carcasses/viscera produced on-site is fit for human consumption :

1. To conduct microbiological sampling tests in accordance with the central competent authority's requirements.
2. To apply and therefore obtain the certificate of hazard analysis and critical control point for slaughterhouses from the central competent authority.

For the certificate in the second subparagraph of the preceding paragraph, the central competent authority may appoint its affiliated agency (institution) or entrust other agencies (institutions) or entities to conduct the required task.
